Dear Parents,

Greetings IAA community, I would first like to take a moment to say a special THANK YOU to all of the students and parents who came to the school this week to work with us in determining our new Mission statement (Purpose). The school’s purpose is absolutely the most important concept in our school as it serves as a guide for all of the institution’s decision-making. A mission statement offers insight into what the entire school community views as the primary purpose for existing. Representatives from our three stakeholder groups (students/parents/staff) are currently working together to put the final touches on our new Mission statement and we will present it to the whole community as soon as it is finished and approved by our Board of Directors.

URGENT: I have observed MANY students coming to school on rainy/wet days without the proper rain protection or extra socks, shirts, etc. Please work with us to keep your children safe from accidents and illnesses during this wet season. Thank you.

Wednesday, the 16th is a special and memorable occasion... One that we will remember in the years ahead.

We would like to invite you to Poetry/Performing Arts Night - May the excitement of Wednesday, the 16th enthuse you, May its enchantment surround you, And may the fellowship that we’ll share, Create happy memories and smiling, magical moments.

EXECUTIVE DIRECTOR’S MESSAGE

Dear Parents,

Greetings IAA community, I would first like to take a moment to say a special THANK YOU to all of the students and parents who came to the school this week to work with us in determining our new Mission statement (Purpose). The school’s purpose is absolutely the most important concept in our school as it serves as a guide for all of the institution’s decision-making. A mission statement offers insight into what the entire school community views as the primary purpose for existing. Representatives from our three stakeholder groups (students/parents/staff) are currently working together to put the final touches on our new Mission statement and we will present it to the whole community as soon as it is finished and approved by our Board of Directors.

URGENT: I have observed MANY students coming to school on rainy/wet days without the proper rain protection or extra socks, shirts, etc. Please work with us to keep your children safe from accidents and illnesses during this wet season. Thank you.

Nausea and vomiting are symptoms of different medical conditions which are usually harmless but sometimes can be a sign of a more serious illness. The child needs to stay at home in observation.

In children vomiting is common because of viral infection, food poisoning, motion sickness, overeating, coughing, and illnesses in which the child has a high fever. There are several ways to control or relieve nausea and vomiting:

- Drink clear or ice-cold drinks.
- Eat light, bland food, try saltine crackers or plain bread. Avoid fried, greasy, or sweet foods.
- Eat slowly, small portions and frequent meals every three or four hours. Drink beverages slowly. Avoid activity after eating.
- Take your child to the doctor if: vomiting lasts more than a few hours; diarrhea is also present; signs of dehydration and if fever is higher than 100 degrees Fahrenheit.

Research has shown that families who talk openly with their children make a positive difference in building a strong foundation for sexual health. Children in those families tend to grow up making healthy choices for themselves and are more protected from sexual exploitation.

THE TECHNOLOGY FAIR WAS A SUCCESS!!

We want to say thank you to the parents who came in support of their children with their presence and a special thank you for those teachers who helped monitoring every session.

Check the complete photo album of the event here
